

Practice Assistant

An AI assistant built for small Australian law practices. It runs inside Claude Cowork, handles your inbox, organises matters, tracks deadlines, and drafts routine documents — so you can focus on the work that matters.

CLAUDE COWORK

What Is Practice Assistant?

Your AI colleague

Practice Assistant is a dedicated AI assistant for small Australian law practices. Each lawyer names it personally — "Ramon", "Maya" — and it works inside Claude Cowork, connected directly to your email and document management system.

It handles the routine administrative load: inbox triage, matter organisation, deadline tracking, and drafting from your own precedents. It runs in the cloud, so it's always available.

Who it's for

- Small law practices using **Microsoft Outlook and SharePoint** or **Google Workspace**
- Lawyers who want AI assistance without compromising client confidentiality
- Practices looking to reduce administrative overhead without adding staff

What it needs

- A paid **Claude plan with Cowork**
- **Microsoft 365** (Outlook and SharePoint) or Google Workspace

Feature 1: Daily Inbox Brief

Every morning, Practice Assistant scans your Outlook inbox and delivers a structured brief before you've had your first coffee. It skips newsletters and notifications, then matches each email to a matter using the matter number, client name, or other party.

🔴 Urgent Today

Items requiring same-day attention, with hearing and filing dates pulled exactly as written and their source cited.

📅 17 This Week

Upcoming items sorted by priority, matched to the correct matter file for instant context.

ℹ️ For Information

Relevant correspondence filed and ready for review — no action needed right now.

? Unmatched

Anything it can't match to a matter is listed separately so nothing slips through the cracks.

Feature 2: Matter Dashboard

A single HTML page gives you a complete picture of your practice each weekday morning. The dashboard refreshes automatically — no manual updates required.

Today's Actions

All items requiring attention today, drawn from your inbox and matter files.

Key Dates — Next 30 Days

Hearing dates, filing deadlines, and limitation dates surfaced and sorted.

Open Matters by Status

A live view of all active matters, grouped by stage or status.

Emails Awaiting Reply

Outstanding correspondence flagged so follow-ups don't get missed.

Unfiled Attachments

Attachments sitting in your inbox that haven't been saved to the matter folder yet.

📄 **Smart flags:** Matters with no activity in 21+ days are flagged as "quiet." Dates within 3 business days are highlighted prominently.

Feature 3: Matter Summaries

Ask Practice Assistant "Where are we at with Smith?" and get an instant, sourced summary — no manual file review required.

Instant Matter Status

Each summary includes the current matter status, key dates, open actions, recent correspondence, and documents on file — all compiled from your actual SharePoint folder and email history.

Things to Raise

When preparing for a call or hearing, Practice Assistant generates a "things to raise" list — pulling together unresolved issues, upcoming deadlines, and recent developments so you walk in prepared.

Feature 4: Intelligent Filing

Practice Assistant files emails and attachments into the correct SharePoint matter folder automatically, using consistent naming conventions. It never overwrites existing files without being asked.

1

Correspondence

Client and third-party emails filed by date and sender.

2

Court Documents

Pleadings, orders, and notices organised chronologically.

3

Evidence

Affidavits, exhibits, and supporting materials grouped by type.

4

Drafts & Notes

Working documents and internal memos kept separate from final versions.

Feature 5: Drafting from Templates

Practice Assistant works with **your own Word precedents** — not generic templates. It fills them with the correct matter details, client information, and dates drawn from your files.

Uses your precedents

Drafts are built from the lawyer's existing Word templates, maintaining your firm's style and language.

Highlights gaps, never guesses

If information can't be sourced from your files, it's flagged clearly rather than assumed or invented.

Creates reusable templates

Any completed document can be converted into a reusable template on request, building your firm's knowledge base over time.

Feature 6: Scheduled Routines

Lawyers choose which routines run and when. All routines execute in the cloud — they keep working even when your computer is switched off.

Morning Brief

Delivers your daily inbox summary and priority actions each weekday morning.

Deadline Radar

Scans for upcoming filing and hearing dates within your chosen window.

Dashboard Refresh

Updates your matter dashboard with the latest emails, dates, and file activity.

Unfiled Attachments Check

Flags attachments sitting in your inbox that haven't been saved to the matter folder.

Awaiting-Reply Chaser

Identifies emails that haven't received a response and flags them for follow-up.

Weekly Matter Review

Summarises activity across all open matters for your weekly check-in.

Guided Setup — About 45 Minutes

Getting Practice Assistant up and running is straightforward. The guided setup walks you through each step, and you'll test everything with a dummy matter before going live.

Privacy first

During setup, you'll explicitly turn off model training — your client data is never used to train AI models.

What you'll have at the end

- A named assistant ready to work
- A structured SharePoint matter register
- Your chosen routines scheduled and running
- Confidence that everything works correctly

Built-In Safeguards

Practice Assistant is designed with legal practice standards in mind. Every safeguard is built in by default — not optional.

It never sends an email

Practice Assistant drafts only. Every communication goes out in the lawyer's name, never the assistant's.

It never deletes or overwrites

Files are never deleted or overwritten without an explicit instruction. Existing documents are always preserved.

Calculated deadlines are marked "to verify"

Any deadline calculated by the assistant is clearly flagged — the lawyer always makes the final call.

Every fact cites its source

Each statement references the specific email or document it came from, so nothing is taken on faith.

Client matters never mix

Information is strictly isolated by matter. There is no cross-contamination between clients.

📋 **Requirements to get started:** A paid Claude plan with Cowork, and Microsoft 365 (Outlook and SharePoint).
